Sviridov, A. I.

FUNCTIONAL MORPHOLOGY OF THE PERIVASCULAR LYMPHATICS IN THE VERTEBRATES. [1963] [11 p. 12 refs. FASEB manuscript no. S 194-2. Order from OTS or SLA \$1.60 63-23047 Figs. available on loan from OTS Trans. of Arkhiv Anatomii, Gistologii i Embriologii (USSR) 1962, v. 42, no. 5, p. 83-88.

DESCRIPTORS: Physiology, Morphology, *Lymph, *Lymphatic system, *Blood circulation, Animals, Histology.

Perivascular lymphatics in the vertebrates show no definite organ localization. Their presence in various organs is not associated with animal taxonomic groups but is a result of particular anatomical relationships obtaining locally. Perivascular lymphatics are found in sites where the serous or mucous membranes containing the primary lymph plexuses are only loosely (Biological Sciences--Physiology, TT, v. 10, no. 7) (over)
